Jane is reading a magazine article about koalas. Read the article and choose the best answer for each question.

Nature Weekly

Vol. 43, June 20XX

Koalas

Koalas are cute mammals that live in Australia. They look like bears, but in fact, they are not.

Koalas have a grey body and a white chest. They have large ears, a black button nose and sharp claws. Female koalas have a pouch to carry their babies, just like kangaroos.

Each koala eats about 1 kg of leaves every day. They do not drink very much because they get most of their water from the leaves they eat.

The number of koalas is getting fewer because there are not enough healthy forests for them to live in. If we still want to see these cute animals, we should play our part in protecting the environment!

Koalas

Koalas are cute mammals that live in Australia. They look like bears, but in fact, they are not.

1. What are koalas?

- A. people
- B. animal
- C. fish
- D. food

Koalas have a grey body and a white chest. They have large ears, a black button nose and sharp claws. Female koalas have a pouch to carry their babies, just like kangaroos.

2. How do female kangaroos carry their babies?

- A. by hand
- B. by a pouch
- C. by legs
- D. by a paper bag

Each koala eats about 1 kg of leaves every day. They do not drink very much because they get most of their water from the leaves they eat.

3. How do koalas get water?

- A. from the river
- B. from themselves
- C. from the leaves
- D. From the sea

The number of koalas is getting fewer because there are not enough healthy forests for them to live in. If we still want to see these cute animals, we should play our part in protecting the environment!

4. Why is the number of koalas decreasing?

- A. because they are cute
- B. because there are not enough healthy forests
- C. because people kill koalas
- D. because there are enough healthy forests
