Daily News

More Summer Days are Coming!

What do you think Hong Kong's weather will be like in the future? It will be getting hotter and hotter! The annual number of very hot summer days will rise from the average of 11 to 24 in one hundred years. The number of very hot summer nights will also go up. Very hot summer nights will also go up, from eight to 30.

5

The Hong Kong Observatory recently did a study and found that by the last decade of this century, the annual mean temperature will go up 3.5°C above the average of 23°C.

On the other hand, the number of cold winter days will fall from 21 to less than a day. In other words, there will not be a single cold day in eight out of ten years.
