

### The Feeling of Getting Good Grades

For every examination and dictation in Chinese lesson, I always get bad marks even when I try my hardest.

This time I make up my mind to work hard in Chinese studies. I ask Mum for advice. Mum said, 'Every day, you need to focus more on your Chinese lessons, and you need to know the meaning of every vocabulary. Finally, you need to know how to make a sentence with the vocabulary.'

Then, I follow Mum's advice seriously every day. At last, I got a good grade on the Chinese examination. I feel very happy.

I realise studies need good methods.
